

On behalf of the American Student Dental Association (ASDA), a student-run organization that represents the rights, interests and welfare of 22,000 dental students across the country, thank you for voting to accept the American Board of Dental Examiners (ADEX) CompeDontDTX. This will help the University of Mississippi Medical Center School of Dentistry graduates obtain their licence during these uncertain times. We urge you to further modify the requirements for initial dental licensure to ensure graduates from other states can practice in Mississippi. We are asking you to change licensure requirements now to allow for the following exams to be accepted as new alternatives to current licensure requirements.

- Dental Licensure Objective Structured Clinical Exam (DLOSCE). This exam will be released on June 15 and will be administered by the Joint Commission on National Dental Examinations (JCND). The DLOSCE is a high-stakes licensure examination consisting of multiple, standardized stations, each of which will require candidates to use their clinical skills to successfully complete one or more dental problem solving tasks without performing procedures on a patient.
- Southern Regional Testing Agency (SRTA) manikin-based restorative skills module using cutting-edge dental products that are highly effective in simulating a live patient's dental procedures.
- ASDA recommends the manikin-based alternatives are adopted in lieu of the patient based restorative and periodontal (if required in your state) portions.

Recent dental school graduates can play a critical role in helping address the wide-ranging impacts of COVID-19. They cannot do this without licenses.

We urge you to make these changes now to expedite the licensing process for 2020 graduates and ensure they can begin serving communities in your state as soon as possible.

Regards,

ASDA
